PROFILE

Junior Software Developer with hands-on experience in backend development and software testing, gained through professional internships. Proficient in C#, .NET 8, Entity Framework Core, SQL Server, MongoDB, Postman, Azure DevOps, and Jira. Eager to continue expanding my technical skills while contributing to the development of efficient, reliable, and high-quality software solutions.

EXPERIENCE

AppSalud — Tectrics SRL Jan–Mar 2026
Internship | Backend Developer | Tectrics SRL

Developed and implemented clinical modules for the AppSalud system using .NET 8, React/Vite, SQL Server and MongoDB with Clean Architecture and CQRS
Collaborated in a Scrum team using Azure DevOps for task management and version control

Software Quality Assurance Intern (QA) April – June 2026
Internship | QA | CTB Banreservas

- Executed functional and API integration testing using Postman and cURL to verify compliance with functional requirements.
- Configured test data and test cards within the core banking system to validate credit card product workflows.

LANGUAGES

- Spanish (Native) - C2
- English (Intermediate) - B1
